Earth Day to culminate weeks worth of events

Celebration to feature displays, booths, speakers

By Mary Frederisy
Staff Writer

The 20th anniversary celebration for Earth Day, which was the largest gathering for any single cause in history, begins today and will culminate April 22nd after a weeklong schedule of speakers, booths, displays and events.

This is the first year since 1970 that Earth Day has been celebrated, and this time it will be international in scope, with 125 countries participating, said Mike

Rauchwerger, a physics senior and coordinator of Cal Poly's Earth Day.

Rauchwerger said that only recently people became receptive to the idea.

"During the Reagan years this would not have been possible," he said. "With the '80s, there was a lack of concern because of Reagan policies. Things are starting to change a bit, and people are thinking about the whole."

Janeen Murray, a biology junior, coordinated a Judy Gorman concert through Students for Social Responsibility for Earth Day. Murray said the key to Earth Day's success is awareness.

"People need to know that the Earth has to be taken care of right now," she said. "It's a lifetime responsibility. Earth Day is a good thing to celebrate, but we've got to work to keep (the Earth) beautiful and respect it."

Rauchwerger said that once people are aware, they can learn to help the environment by changing their daily habits.

"The key is re-learning how to live," he said. "We've grown up with certain practices. It's not about making big sacrifices, but changing habits. That can make a huge difference."

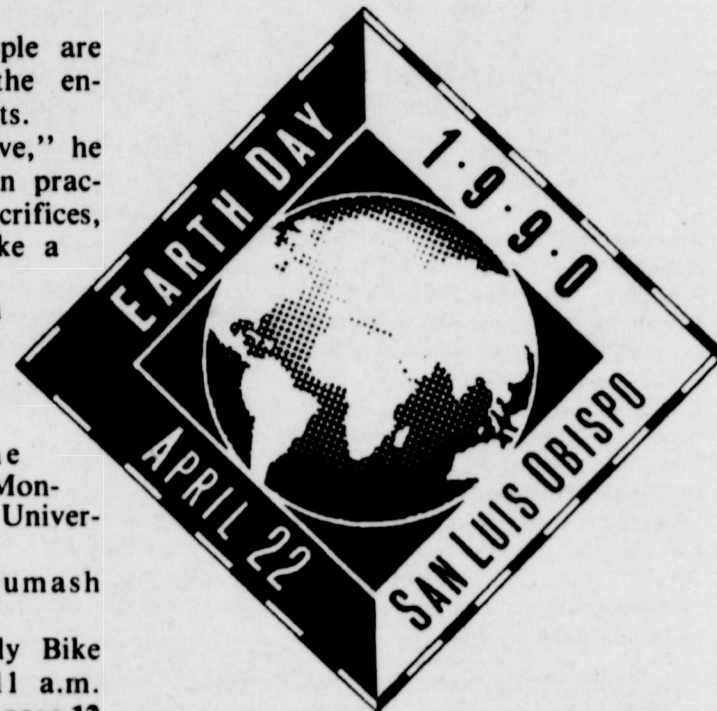

There are over 160 events in San Luis Obispo alone, Murray said. Some of those on campus begin April 16 include:

- Holocaust Memorial Name Reading and Candlelight Vigil, Monday noon to Tuesday noon in the University Union plaza.

- Judy Gorman concert, Chumash Auditorium, Wednesday, 7:30 p.m.

- "Earth Festival" concert and Ugly Bike Contest, Thursday, Dexter Lawn, 11 a.m.

Speaker addresses minority civil rights

Brandon K. Engle
Staff Writer

A Palestinian man who has been charged with violating U.S. national security laws spoke out against the oppression of the Arab-American community in Cal Poly's University Union, Thursday.

Khader Hamide's lecture, "Unheard Voices: The Arab-American Community in the United States," was part of the 1989-90 Arts and Humanities Lecture Series. This year's theme is "Silenced Voices: From the Margins of America." His lecture addressed the civil rights, not only of the Arab-American community, but of minority groups in general.

Hamide, his wife, five Palestinian immigrants and a Kenyan woman were arrested on January 26, 1987 by the Immigration and Naturalization Service, FBI, and the Los Angeles Police. They were held without bail under maximum security.

Charged under the 1952 McCarran-Walter Act — being a member or affiliated with a group that distributes literature espousing worldwide communism, they were allegedly a threat to national security. Hamide had gone through the process of becoming an American citizen only to

Khader Hamide

be arrested the same week his citizenship was to have been granted.

A legal battle has been ongoing for the last three years over the U.S. government's authority to arrest and detain persons believed to be a threat to national security. The U.S. government believed these individuals were capable of committing terrorist acts.

"The Arab-American community is an old community that goes back to the middle of the last century," Hamide told the audience. "And throughout the last 20 years our community has suffered tremendous

Resident hall advisers seek priority registration perk

By Larre M. Sterling
Staff Writer

ASI is considering priority CAPTURE registration for resident hall advisers.

Poly's 1989-90 resident adviser team decided to seek priority registration for future resident advisers through a recent proposal to ASI.

"There is a severe time conflict when you are a resident adviser," said T.J. Jeremiah, a resident adviser in Fremont Hall. "The tremendous demands of the job pulls a person in a variety of directions."

A six-page job description sets

the parameters for the RA position. Many of the job requirements present difficulties for the student resident advisers.

According to the job description, resident advisers are restricted from taking classes after 5 p.m. and from taking classes scheduled from 3 p.m. to 5 p.m. on Mondays, Wednesdays and Fridays because of a conflict with Psychology 251, a mandatory staff development class.

Resident advisers also are required to invest an average of 46 hours a week in the residence hall. Responsibilities include nights on duty, front desk

responsibilities, hall government meetings and activities, and other obligatory meetings.

"I feel all these demands drain on a person," Jeremiah said. "We live the job. We tend to think priority registration will have a tremendous impact."

According to Jack Manning, a resident adviser in Yosemite Hall, having CAPTURE priority will benefit the administration and community.

"Priority registration will be an emotional pat on the back by the administration," Manning

Prof gets international scholarship

Will compare U.S. schools to foreign countries' systems

By Patty Hayes
Staff Writer

A Cal Poly education professor recently was named the recipient of an international scholarship which will allow him to spend time overseas comparing American and foreign educational systems.

Erland Dettlof was one of 50 recipients of the Phi Delta Kappa 1990 Gerald Howard Read International Seminar Scholarship. The organization is a coed, in-

ternational, professional fraternity made up of more than 136,000 educators in the United States, Canada, Mexico and 12 other foreign countries.

"It'll be my first trip overseas," Dettlof said. The trip will include "some time seeing major landmarks — plus seeing schools and institutions," he said.

Winners can attend a seminar any time before the summer of 1992. Dettlof said he plans to use his scholarship in the summer of 1991. Though locations of the 1991 seminars are not decided as yet, seminars are being offered this year in such places as Scandinavia, China and Tibet, Australia and New Zealand,

Ecuador, and the Soviet Union.

Dettlof said he would prefer to go to the Soviet Union, China or Eastern Europe because he would like to see, first hand, the similarities and differences between the education systems in these countries and that of the United States.

"(I would) like to go to a country that our educational system is often compared to," Dettlof said.

He said he plans to use the results of such a comparison in the graduate level classes that he teaches at Cal Poly.

"I teach a class in guidance and counseling that deals with

Commentary

Make prisons work for society

By Marianne Biasotti

About 10 miles north of San Luis Obispo lies a city which most people would like to forget. We don't like to think about the 6,000 men who are isolated from society at the California Men's Colony, and with reason.

These men have committed some of the most heinous crimes in California, and when we hear news of them it is usually good news for them and bad news for us — that men like Larry Singleton and Charles Rothenberg are out on parole.

The main function of the prison system is to protect society from convicted criminals, and the CMC is doing a good job of that, said Associate Warden Edward Martin. The thing that bothers him the most is to see 6,000 people with an incredible amount of skill being wasted, because 60 percent of the inmates in California eventually return to prison after their release.

That wasted skill and rotting manpower should be put to use immediately, and the stifling limits of incarceration should expand. Governor George Deukmejian was right on when he proposed a plan to put prisoners to work while serving time. Not only would this help pay their way and alleviate taxpayer money, but their wages could also help compensate victims and their families.

Unfortunately, Democrats defeated the plan, catering to the strong voice of labor unions, who are very much opposed to incorporating inmates into private industry. They say it will put this captive labor force in direct competition with law-abiding citizens and take their jobs away.

That is ridiculous. A recent article by David Glidden in the *Los Angeles Times* backed Deukmejian's idea that overseas markets, like building VCR's and microchips, could be re-captured by this cheap, consistent labor force. Corporations could make their products cheaper with a prison labor force than they could overseas.

The CMC would be a great place to start. It is different than all the other prisons in the state in that it offers specialized vocational and educational programs to the inmates. Many inmates from other prisons are sent to CMC with the idea that they will participate in the non-violent, program-oriented setting, said Warden Wayne Estelle. About 22 percent of the inmates work in these specialized programs, and receive nominal wages

from 25 to 90 cents an hour.

During a visit to the CMC, it was amazing to see the various facilities offered to the inmates — there were labs in electronics, welding, computers, X-ray technology, sheet metal, a machine shop, and a shoe factory. There was even a drafting lab with five "Arche-Rival" drafting computers, kind of like the ones in the CAD-CAM lab at Cal Poly. In addition there were educational classes in various disciplines. Inmates must pass tests before entering any of these programs.

Carolyn Pressley, who recently received the Teacher of the Year award at the CMC, said these inmates are usually very motivated because the climate there encourages them. She believes the outside community needs to take certain responsibility for this population. Pressley believes that working within the prison is not enough, and that outside industry needs to develop training programs for inmates and work with the prison.

If the jobs given inmates are not competitive in the state workforce, there is no reason legislature should ignore this population as a cheap and feasible workforce. Some people would rather see prisoners rot away and do nothing that merits a wage while they are being punished for their crimes. But if rehabilitation is possible, a learned skill and sense of accomplishment is a good place to start.

Martin said inmates at the CMC have provided real services for the community, by helping to fight fires with the fire department, cleaning SLO creeks and saving the city thousands of dollars, and painting state vehicles.

But this is not enough. Certainly this labor force can be put to even greater use for the community by taking jobs that have already gone to cheaper laborers to our south or overseas. Let's hope our state legislators follow Deukmejian's example, and unchain not only taxpayer money but then untapped potential of a stagnant population. This is the best way prisoners can pay back society for their crimes against it.

Marianne Biasotti is a former Mustang Daily staff reporter who is now enjoying the good life as a civilian. But she still enjoys throwing in her 2-cents worth.

Editorial

Take a stand for your beliefs

Today's pro-choice rally in the University Union will be just one more event for Cal Poly's socially-unconscious student body to ignore. We wish this weren't true, but the students here are not known for great showings at events of social importance. Events during this year's Afro-American and Women's weeks, as well as many ASI Speaker's Forums, have drawn disappointingly low turnouts.

The most recent example was Khader Hamide's lecture last Thursday. Before obtaining citizenship, Hamide was arrested under the McCarran-Walter Act for violating U.S. national security by receiving pro-Palestine Liberation Organization literature. The event was well-publicized, yet only about 20 people attended.

This may sound a little bit heavy-handed. We have our beliefs, but many times we get so caught up in our daily routines that finding the time to stand up for those beliefs can be difficult. Yet, being the idealistic college students that many of us are, we still complain about the social injustice around us.

If you have middle-of-the-road views on abortion — which few people have these days — then this rally is not meant for you. But if pro-choice is something you believe in, show up and give your support.

Whatever your stand is on various social issues, you should utilize the means for making your voice heard. It is important to stand up for what you believe in and not just pay lip-service.

Letters to the Editor

Earth Day ruined by Poly Penguins

On April 22, Earth Day 1990 will commence, and millions of citizens around the world will show their concern for Mother Earth by setting in motion a movement dedicated to saving our environment. Over 13 major environmental organizations such as the Sierra Club and Greenpeace will help sponsor activities to kick off what promises to be the decade of the environment. Parades, seminars, speeches, and fairs will take place around the globe to help heighten awareness of issues

such as air pollution and deforestation.

College students are major players in Earth Day 1990, and will help lead the way in the drive towards a cleaner and healthier planet. Unfortunately, it looks like some students at our sister college up north don't feel the way 95 percent of college students around the nation do.

According to the environmental group San Luis Obispo Greens, instead of working to save the environment, a gang of Cal Poly SLO students called the **Cal Poly Penguins** have chosen **Earth Day 1990 to destroy it. At the very same time millions have chosen to honor the earth, these sensitive people are sponsoring**

an off-road motorcycle race in Los Padres National Forest!

Thanks to the Penguins, while the rest of the world expresses respect and concern for the environment, Earth Day 1990 in SLO County will see 500-odd participants tear up National Forest land, foul the air, frighten wild animals and waste thousands of gallons of fossil fuel.

I urge all faculty, staff, administrators and students to make their voices heard in protesting this most perverse event on Earth Day 1990. Let us, if possible, attempt to shame these uncaring, selfish, overgrown adolescents into cancelling this "race in your face" on Earth Day. Let's let them know this type of

event, and the corresponding attitudes which go with it, have no place on our planet.

Happy Earth Day 1990!

Don Kimball
Communications Senior
Cal Poly Pomona

What's in a name

As an English major, I pay a great deal of attention to words. I'd like to direct your attention to some mislabelling in the abortion debate.

First off, the debate is not over a woman's right to kill children, but a woman's right to choose to abort a fetus. One side of the

debate firmly believes women have this right. They are accurately labelled "Pro-choice."

The other side supports legislation to deny woman this choice. Since the word "choice" implies more than one option, this constituency's correct label is "Anti-choice". Often they are mistakenly called pro-life. Strictly speaking, this label suggests that those of us who support choice are anti-life.

Pro-choice advocates are, by no means, would-be killers. Indeed, unlike our pro-life President Bush, many oppose the death-penalty.

Awareness week to tell about organ donorship

Local medical group to help promote nationwide event by distributing donor cards

By Moorea Warren
Staff Writer

One person's death can give another life when organs are donated. This gift of life however, is in short supply compared to the need.

To help educate the public and increase donorship, April 22-28 has been designated as National Organ/Tissue Donor Awareness Week.

The Kidney Transplant Assistance Group (KTAG), will be handing out packets at Farmer's Market which will include pink donor signature cards that attach to drivers licenses, according to Maurice Schmitz, vice president of KTAG, who received a new kidney in 1986.

KTAG was formed in 1989 to support patients who have either received transplants or are on dialysis waiting for a new kidney. Another objective of the group is to inform the public that donor organs can save lives of kidney failure patients. The group's membership is about 58 people.

Dialysis patients receive treatment two to three times a week depending on how sick they are, said Schmitz.

Dialysis takes blood through an artificial kidney which removes poisons from the patient's blood.

"We support the members both mentally and physically so they can get through," Schmitz said.

For many of them, this marks the end of their lives if they do not receive a new kidney, Schmitz said.

Cyclosporine is a new anti-rejection drug that transplant patients must take daily for the rest of their lives. The drug which is made from an olive-oil base does have side effects of eye deterioration and rapid hair and

gum growth.

Schmitz, who is a part-time graphic arts teacher at Cal Poly, said the side-effects are minor compared to not having a new kidney.

"I have a full life with my family and work, all I have to do is take my pills in the morning," Schmitz said.

Jack Jones, a professor of education at Cal Poly, received two new kidneys in 1985, since both of his were larger than footballs and weighed 33 pounds each.

Jones received his kidneys from a 24-year-old man killed in a motorcycle accident.

"Within 24 hours of his death, he was living again through me," Jones said.

Jones waited for three weeks and received his transplant on Friday, Sept. 13, 1985.

He pointed out how important it is for people to sign their donor cards.

"It truly is the gift of life," Jones said.

Accidents and strokes claim the lives of 100,000 people every year. While 20,000 can become organ donors, only 3,000 do, according to the California Transplant Donor Network (CTDN).

The CTDN is a non-profit organization which helps to match donors with recipients, obtain consent from families and contact transplant teams. The center's headquarters is in San Francisco and serves five Northern California areas including San Luis Obispo. An 800 number is answered 24 hours-a-day in order to screen and match all donors possible.

Currently, there are 25,000 people in need of a transplant, according to Valerie Fisher, R.N. and transplant coordinator for San Benito, San Luis Obispo and

Monterey counties.

"One-third to one-half will die waiting," Fisher said.

30 to 40 people in San Luis Obispo are now waiting to receive kidneys, she added.

For a patient to be placed on a waiting list depends on how sick they are and what kind of economic support they have.

The person who has been waiting the longest receives first chance at a donor organ, said Fisher.

Any organ can not be placed into any body. Certain aspects must match up so the body will not reject the organ. For kidney transplants, not only must the blood type match but the tissue must be compatible. Also, the size of the organ is important.

"You don't want to put a large organ into a small body," Fisher said.

Transplants can range in cost from \$30,000 for a kidney to \$160,000 for a liver, according to CTDN.

Some insurance companies now cover part of the cost. Medicare pays for a portion depending on the patient's income, said Fisher.

While the Uniform Anatomical Gift Act allows for anyone 18 years of age or older to donate organs, final authorization must come from the next of kin, according to CTDN.

For this reason, it is important for donor's families to understand and accept the decision, according to CTDN.

Organs that can be

transplanted are the kidneys, heart/lung, lungs, liver and pancreas. A person must be declared brain dead by two doctors in order to become an organ donor.

Advances in technology have increased the percentage of successful transplants. The percentage now ranges between 75 to 95 percent success rate, said Fisher.

Japan currently is experimenting with new drugs that hopefully will raise the rate even higher, Fisher said.

National Organ/Tissue Donor Awareness Week shares the same month with Earth Week.

"We are one of the best examples of total recyclability," Schmitz said.

"We Don't like camping outdoors."

CSU Northridge history professor tells Poly students about India

Addresses issues of political unity in Asian nation

By Bridget Meaney
Staff Writer

A professor of history and Asian studies at CSU Northridge described India as a "complex subcontinent" because of its differences in dress, language, food, customs and beliefs.

Shiva Bajpai spoke to an audience of about 45 people Thursday night at Cuesta Canyon Lodge in San Luis Obispo on "Perspectives on the Political Unity of India."

"We have everything in India ... and worse," Bajpai said in reference to the many various differences that can be found in Indian culture.

"When you visit India, you notice both differences and certain commonalities in Indian culture," Bajpai said.

He gave an example of religion

and how most people profess some form of Christianity.

"You will find certain commonalities in all the people if you go to India," he said. "Most people in India believe in karma, rebirth and some form of a god. These notions are different than Western notions, and yet throughout Europe they've never had political unity."

In the early to mid-1900s, British rule took over and "unified" India, Bajpai said. European control helped to influence India's progression with the military, bureaucracy and administration.

"The objective was not to make India strong for the Indians, but to make the British powerful," he said.

"It's true modern India today is structured by the British Empire and it was an important part of India," Bajpai said, "but what is the real reason the British introduced political unity to India? They did it for profit and power - for gold, God and glory," he said.

Bajpai is a graduate of Banaras Hindu University in

India and received his doctorate in Indian history from the University of London.

He was the director of Asian Studies at Cal State Northridge for more than 15 years. He also is working on a book about geopolitics in South Asian history. Last year, Bajpai received the Academic Excellence Award from the National Federation of Indian Associations in America.

Bajpai is the second speaker in a lecture series titled "Culture of India." The program is funded by a grant from The California Council for the Humanities and is co-sponsored by the philosophy, English, history, political science, foreign languages and literatures, and humanities departments at Cal Poly and the India Club of the Central Coast.

The third speaker in the series will be Gerald Larson from University of California at Santa Barbara. He is scheduled to discuss "Religion and Politics in Modern India" and "Shiva: The Lord of Yoga." Larson will speak at the Cuesta Canyon Lodge on May 11 at 7:30 p.m.

Women's Tennis

Cal Poly wins weekend pair

Extends winning streak to six matches

By Chris Soderquist
Staff Writer

Call it the snowball effect, or whatever you may, but the Cal

Poly women's tennis team is definitely on a roll. The Mustangs captured their sixth consecutive victory Saturday with a convincing 7-2 win over

tough match to scrappy Ephel Olivarez, 6-4, 6-4. Despite the loss, head coach Marla Reid was pleased with Green's play. "Erin had a good loss at No. 2," explained Reid. "There are things called significant losses, and that was a significant loss because she didn't get killed."

From there on it was all Mustangs as they steamrolled past the Golden Eagles.

At No. 3, Tracy Matano rolled past Tina Trumbull, 6-4, 6-1. Playing No. 4, Vicki Kanter made easy work of Ann Kellogg, 6-2, 6-2. Alison Lean tossed up a pair of goose eggs at No. 5 with a 6-0, 6-0 demolition of Karen Lim. And rounding out singles play, freshman Christy Murphy silenced Jennifer Choi, 6-1, 6-0.

Entering doubles play, the Mustangs needed to capture one of three matches to lock up the victory. Instead, Cal Poly swept through doubles play without surrendering a set. Ironically, when the teams played earlier in the year, CSULA won all three of

CSU Los Angeles.

Though the play on the court was characteristic for the Mustangs, the weather uncharacteristically frowned upon the match as overcast skies and breezy weather prevailed.

Despite dropping singles matches at Nos. 1 and 2, the Mustangs were able to gain straight set victories in the remaining seven matches. Debbie Matano, in the No. 1 slot, was dropped by the nation's top-ranked Division II singles player, Edna Olivarez, 6-1, 6-4.

Erin Green, who was elevated from No. 4 to No. 2 singles, lost a

Softball

Mustangs take three of four

Batters sweep one twin bill; split two with Dominguez

By Gregg Mansfield
Staff Writer

The Cal Poly softball team opened a stretch of 14 consecutive California Collegiate Athletic Association conference games on the right foot this weekend.

The Mustangs prospered as they captured three of four games, including a two-game sweep of UC Riverside.

Playing back-to-back doubleheaders on Friday and Saturday, Cal Poly stopped UC Riverside 4-3 and 1-0, while splitting a pair with CSU Dominguez Hills 2-3 and 3-1 on Saturday.

"All of our conference games from here on out are important," said Cal Poly head coach Lisa Boyer after Saturday's doubleheader.

Cal Poly improves its conference record to 7-5 and 21-17 overall. The Mustangs will now

play 10 straight conference games — including five more double-headers.

In Saturday's nightcap the Mustangs exploded for three runs in the second inning to shut down Dominguez Hills. In the sixth inning the Toros mounted a threat against Cal Poly, but Mustang pitcher Michelle Sorci them held off in going the distance.

Sorci allowed seven hits and one run in her stint, while issuing one strikeout.

Kelly McInerney went 2-for-3 including a double for the Mustangs, while freshman Stephanie Tidwell contributed a hit.

Cal Poly, which had lost to the Toros earlier in the season in a non-conference tournament game, must have been weary after the first game, Boyer said.

"We hit better and came out with more intensity in the second game," said Boyer. "They (the Mustangs) just didn't come out a 100 percent."

"By the third inning we were there, but it was the first couple of innings that hurts us," she said.

Despite the strong pitching performance of Laura Fawcett

who went seven innings and allowed five hits including three runs and two strikeouts, the Mustangs were unable pick up the victory.

Cal Poly hit the ball hard, but couldn't score the runs. Cheryl Lutes went 1-for-3 and scored, and Julie Grennan also went 1-for-3, including a double. Tidwell added a triple for the Mustangs.

In Friday's action, Lisa Johnston picked up the win for Cal Poly in the first game. Johnston allowed three runs and eight hits, as Mustangs rallied for two runs in the seventh inning to beat UC Riverside.

The second game was a little too close for Cal Poly's standards. Julie Rome, a freshman pitcher from Santa Maria, picked up her first win in the CCAA for the Mustangs. Rome surrendered just two hits, while striking out four and giving up one walk.

In the two games Kathy Jones went 4-for-7, while Steffanie Adams and Kim Schott collected two hits.

"We're playing better as a team now," said Boyer.

Cal Poly takes on the Roadrunners of CSU Bakersfield Wednesday at the Mustang fields.

DAVE COYKENDALL/Mustang Daily

Matt (left) and Scott Hempel finish their workout.

Freshmen brothers leave CCAA in dust

By Neil Pascale
Staff Writer

Matt Hempel's hair drips down to his shoulders. Scott Hempel, Matt's brother, prefers his hair short.

Matt enjoys reading thought-provoking books. Scott would rather spend his time drawing.

Born 25 minutes apart, similarities between the two brothers are easy to spot. It's the differences that are harder to recognize.

"We have this thing where we don't like being referred to as twins," Matt said. "We see ourselves as two totally different people."

In fact, both brothers confessed to changing their hairstyles at the same time to show their individualism.

"It doesn't take long to see that each have their own distinct personalities," Tom Henderson, the men's track and field and cross country coach, said.

However, both brothers have one thing in common — they excel in long distance running.

At Walnut High School near Pomona, California, Scott captured two state

championships in cross country and one year finished 10th in the country.

Matt, in his senior year, won CIF in the two-mile event in track.

"I think they're both potential national champions," Henderson said. "They're running right now at a very high level for freshmen."

Since their arrival at Cal Poly, they have helped the cross country team place third in NCAA Division II National Championships. Individually, Scott placed 34th and Matt finished 49th.

Now, they're concentrating on track, a sport which separates the brothers athletically.

Using his speed and strength, Scott has been most effective in the 5,000 meters whereas Matt has performed on a higher level in the 10,000 meters, said Henderson.

Last week at the West Coast Relays at Radcliff Stadium in Fresno, the tandem finished within 10 seconds of each other in the 10,000 meters.

"I felt really great in the

San Jose

MANAGEMENT INTERN

Salary: \$31,400/year

The City of San Jose is offering a unique and exciting opportunity for an energetic and dynamic person to gain hands-on experience and insight into top level city management. As an intern, you will directly assist the City Manager and City Department Heads in organizing, developing, researching and evaluating City services and programs. You will be expected to provide creative and innovative ideas to the City's government.

The program consists of a one-week orientation period and work rotations in 3 to 4 departments. One of the rotations may be with the Office of the City Manager.

To qualify for this position, you must be in your last semester of a Master's Degree Program in Public Administration or a closely related field. You must have completed your degree requirement by July 1, 1990. To apply, please send your resume to: Mr. Bob Allen, City of San Jose, Personnel Department (POLY), 801 N. First Street, Room 215, San Jose, CA 95110. Resumes should include the following information: *Honors & extracurricular activities *Paid and volunteer work experiences *Names and telephone numbers of three references (one of which must be a faculty member or employment supervisor) *Official graduate and undergraduate transcripts *A 3-5 page typewritten paper on why you are seeking this position (including your career goals) *A copy of a term paper or work report written by you. **Final filing date: Friday, May 18, 1990.** The City of San Jose is proud to be an Equal Opportunity Employer.

ALCOHOL AWARENESS WEEK APRIL 16-22

Events: Tues., April 17 1 a.m. Adult Children of Alcoholics - Health Center Conference Room
Weds., April 18 FREE Mocktails - Cal Poly Dining Hall
Thurs., April 19 FREE Mocktails - University Union 11-12 noon
Fri.-Sun., April 20-22 Alcohol Free Weekend

When you party, remember to...

It's as easy as counting from 1 to 10.

Guests:

1. Know your limit — stay within it.
2. Know what you're drinking.
3. Designate a non-drinking driver.
4. Don't let a friend drive drunk.
5. Call a cab if you're not sober — or not sure.

Hosts:

6. Serve plenty of food.
7. Be responsible for friends' safety.
8. Stop serving alcohol as the party winds down.
9. Help a problem drinker by offering your support.
10. Set a good example.

Volleyball sees a different world

New head coach, no Big West play highlight changes

By Gregg Mansfield
Staff Writer

The Cal Poly women's volleyball team opens spring practices this year with a new look: A new coach and no conference.

Still recovering from the release of 12-year head coach Mike Wilton and being bumped from the Big West conference, Cal Poly will be a green team this year.

Craig Cummings, an assistant coach for nine years under Wilton, was named to replace

Wilton as an interim head coach after he was released last season. Although it wasn't the way Cummings wanted a head coaching position, it's a position he was willing to accept.

"I felt if Mike (Wilton) left and I were to leave it's a little unfair to the girls," said Cummings. "They do know us and I wanted to keep something going there."

"This isn't the way you want to get a coaching job," he added. "It's happened, it's the past and time to move on."

Added to the change in the coaching position, Cal Poly was removed from the Big West Conference — a Division I conference. The Mustangs, who were consistently one of the better teams in the conference, were left stranded to find a new conference.

The Big West Conference, in moving the Mustangs out, claimed it was realigning its men's and women's sports teams. However, the athletic conference retained Hawaii, which normally competes in the Western Athletic Conference.

"It's a double-edged sword being moved out of the conference," said Cummings. "We're free to schedule who you want, but the biggest thing is schools aren't forced to come to San Luis."

Cal Poly has just five home matches this season (Apple Computer Challenge, CSU Fullerton, CSU Northridge and Pepperdine), while hitting the road for five tournaments and 23 road games.

"We'll probably be an in-

FULL TUITION PLUS STIPEND

FOR FURTHER INFORMATION AND APPLICATIONS, PLEASE CONTACT: Robert Chaim, Director Graduate and Professional Opportunity Program University of the Pacific McGeorge School of Law 3200 Fifth Avenue Sacramento, California 95817 (916) 739-7177

The fellowships are funded under the Graduate and Professional Opportunities Program, Title IX of the Higher Education Act of 1966, as amended. The purpose of the program is to increase the number of minority students into the study and practice of law. Target groups are chicanos and blacks.

Men's Track

Cal Poly beats Georgetown

By Neil Pascale
Staff Writer

If track and field meets were decided by entry sheets, then the Cal Poly men's track team should have stayed home and waited for the Easter Bunny.

"The entry sheet, which lists the previous best marks of each athlete in the meet, had Georgetown beating us (for third place) by 30 points," said men's track coach Tom Henderson.

However, the Mustangs capitalized on several outstanding individual performances and squeezed by Georgetown on

Saturday in Eugene, Oregon in front of 3,283 people.

The University of Oregon finished first with 208 points, Washington State placed second with 202 points, the Mustangs came in third with 113 points and Georgetown finished last with 110 points.

"The level of this meet is higher than the national championships," said Henderson. "There were some incredible performances; every single winning effort in this meet was extremely fast."

The Mustangs might have

See TRACK, page 8

VOLLEYBALL

From page 6

dependent for the next two years," said Cummings. "Something may change within those next two years that may allow us to join a conference."

Cummings doesn't feel that recruiting of players will be affected by the move from the Big West Conference. The Mustangs signed for the coming season two Volleyball Monthly FAB 50 players — Carrie Bartowski (Cerritos, Calif.) and Christy Campbell (Huntington Beach, Calif.).

"We try to downplay being in a conference when recruiting," said Cummings. "We're open about it. We explain that in the recruiting process. We're not a shady, Joe

Isuzu type of recruiting program here.

"It comes down to the school and the program," he said.

Cal Poly is coming off a stellar season, finishing 19-12 overall, including an upset of top-ranked Hawaii earlier in the season. The Mustangs ended the season with a loss to Hawaii in the semifinals of the Northwest bracket in the NCAA tournament.

The Mustang's lost outside hitter Michelle Hansen to graduation, while Anja Knutsen at the outside hitter position returned to Norway. "We lose a ton between them," Cummings said.

During spring practices,

Cummings is looking to Jennifer Jeffrey and Melinda Norton to make up some of the slack for the loss of Hansen and Knutsen. Lael Perlstrom, named to the Big West all-freshman team, is improving, said Cummings.

Jill Meyers at middle blocker is expected to provide the leadership for the team. Kim Kaaia is expected to handle the setting duties.

"The way the players are working right now, wins will take care of themselves," said Cummings. "If we just play hard in every match.

"We'll have a good team on the floor next year."

HEMPEL

From page 5
 10,000," said Matt. "I felt really smooth."

Currently, Scott is first in the California Collegiate Athletic Association with the fastest time in the 5,000 meters and is seconds away from being automatically qualified in the Division II National Championships.

"Scott is potentially an All-American in Division II this year," Henderson said. "By senior year, he should be running with anybody at any level."

The brothers' mutual love of running developed in elementary school, where they began sprinting by fellow classmates in physical education classes.

When they jumped up to junior high school and experienced their first competition, their interest blossomed.

"When we ran, we beat all the other kids," Scott said. "When you're better at something than other people, you tend to stick to it."

"I think it also helped boost our self-confidence," Matt added.

Now, their training consists of special diets and running up to 60 miles per week.

"Still, it's not what we're supposed to be doing," Matt said. "We should be doing about 70 miles per week, but we're kind of lazy."

Call them lazy, call them anything, just don't call them twins.

TRACK

From page 7
 finished higher if not for some last minute heroics by the University of Oregon.

Twice Poly had individuals leading events in the last round just to see them disappear.

Nathan Cotton's long jump of 23 feet, 3 1/4 inches was bettered only by the last jump of the day.

WOMEN

From page 5
 the doubles matches.

At No. 1, Kanter and Murphy teamed to stop Edna Olivarez and Choi, 6-2, 7-5. The Matano sisters had little trouble with Trumbull/Kellogg, 6-2, 6-1. And Green/Lean knocked off the team of Lim/Ephel Olivarez, 6-1, 6-2.

Reid was impressed with the doubles play of Green and Lean. "Erin and Alison are playing really well together," said Reid. "They work well together and communicate well and they psyche each other up."

On Friday, the Mustangs dropped conference foe CSU Bakersfield, 8-1. Highlighting singles action was the play of Green, who moved up to No. 2 singles and dropped Allison Bruhn, 6-2, 6-2. According to Reid, Bruhn is one of the top 15

players in Division II.

Despite the easy victories, Reid said "it's hard coming out and playing weaker teams." Reid was pleased with her team's psychological effort. "When you're not playing strong people, you tend to let your mind wander and you get a little bit lazy and you don't feel like getting anything out of it."

"We just need to keep the motivation up now because we are going to be in a lull and a lax time," explained Reid. The conference victories improved Cal Poly's record to 7-1 in league and 16-4 overall.

The Mustangs will journey south to Santa Barbara Friday for a non-conference match with the Division I Gauchos. On Saturday, Cal Poly will return home to entertain conference foe U.C. Riverside.

Morro Bay looks north to Canada for water sources

By Bridget Meaney
Staff Writer

As the Central Coast becomes desperate to find new, viable ways to get water, Morro Bay is planning to get water from an unlikely source — a glacier.

Although the idea is still in the planning stages, Morro Bay is deciding whether or not to buy melted glacier water located in northern Canada.

"It's one of the best options we have because it's less expensive than other options," said city water engineer Dave Norton. Norton is part of the Public Works Department, which is making recommendations to the city council on the best ways to get water.

If the Morro Bay City Council agrees to importing glacier water, the water will be drained from the glacier into huge "Bota" bags. These bags hold over 10 acre-feet of water, enough for 10 families to use for one year. The bags would be floated down the ocean, and moored in Morro Bay, where it could be pumped out as the

water is used.

Since fresh water is lighter than salt water, the bags would be easy to transport, Norton said. "At first, I was worried about storms ruining the bags as they made their way to Morro Bay, but the bags are pliable so there's no reason to worry. The only way it can tear is if it catches on something," he said.

Melted glacier water is already bottled and sold by the gallon in many stores, said Norton. "It's a very good quality of water and won't need to be treated at all," he said.

Norton estimates glacier water will cost \$600 to \$700 per acre-foot. This figure is much lower than other potential temporary options, such as water desalination, which would cost thousands of dollars, Norton said.

Usually, Morro Bay receives its water supply from eight nearby wells. However, only four of those wells are now active. The other four wells have become inactive because of problems with salt water and

Speaker: Engineers need to keep current

Says CE, ENVE grads will need further studies

By Tina M. Ramos
Staff Writer

The good news is there is a great demand for civil and environmental engineers. However, once students get their degrees, they'll need continuing studies to further their careers, according to the regional vice-president of the American Society of Civil Engineers.

Robert C. Esterbrooks, a civil engineer and technical consultant with Boyle Engineering, addressed a predominantly male audience of 30 people Thursday at Cal Poly. He spoke on the importance of continuing education for engineers and ways they can keep their professional knowledge current.

"Institutions and consulting firms have a constant need for doctorates in their staff, and even outstanding firms cannot meet that rising demand," he

said.

However, continuing education is available in school as well as on the job, according to Esterbrooks, who has a master's degree in engineering. Many agencies and universities offer scholarships and fellowships for further graduate study, he said.

Some employers also have opportunities for more education and engineering graduates should keep that in mind when interviewing.

"You should check the company's policy for advanced education and make it a criteria for selection, especially in a metropolitan city location," he said. "You will find more and more (firms and companies) are going to be sympathetic to the idea."

He added he usually has three to four students on his staff at any given time, either full-time students or professionals in extension classes. Esterbrooks said he earned his master's degree through his employer's (The City of Los Angeles) two-year engineering program at UCLA.

Employee exchanges are another way to extend one's education, he said. These ex

Automated attendant phone system running

Computerized service is easier, more efficient

By Alex Main
Staff Writer

Cal Poly's Cooperative Education and the Placement Center are testing a new automated attendant telephone system.

"I think it's great," said Marilyn Gipson, one of three clerical assistants who used to handle the burdensome task of answering phones for the offices.

"It's like a giant answering machine," said Norm Johnson, spokesman for Cal Poly's telephone services. He said the automated attendant system is not directly associated with Cal Poly's telephone service but is being rented from Octel Communications solely for use by Cooperative Education and the Placement Center.

This new computerized system specializes in efficiency of service. When callers using touch-tone telephones dial either 756-2501 (the Placement Center) or 756-2645 (Cooperative Education), they are greeted by the automated attendant who asks them to enter the extension number or the last name of the person they wish to contact.

If someone is unsure about

who or what department they want to talk to, the system will help the caller by listing a variety of options.

If the caller is still confused and doesn't respond to the automated attendant's request for action, the call is transferred to a member of the PC/CE department for personal assistance.

And if, at any time during the call, a person becomes frustrated or simply doesn't like hearing automated voices, "0" can be punched for live personal assistance.

Roxana Lopez, the administrative operations analyst for PC/CE, said once people become familiar with the system, less than 25 percent of all incoming calls should require the aid of a receptionist.

The computerized system is also beneficial in eliminating manual statistical counts, Lopez said. In just a few seconds she is able to call up information that can tell her the average number of calls per week, which averaged more than 280 per day last week.

"It's off-campus callers that have a problem with computer voices," Lopez said. "Students handle the system real well."

She stated those people who are intolerant of the system are mostly local employers — "the ones who call up who need their lawn mowed," Lopez said.

The system's major disadvantage, she said, is that it works only with touch-tone phones and not rotary phones.

WATER

From page 9
metals in the water. Both problems are expensive to treat, said Norton.

Importing glacier water to Morro Bay is only a temporary

solution to the water shortage. For a long-term solution, Norton said Morro Bay is planning to build a dam on the San Bernardo Creek which will collect water during the rainy season, he said.

ESTERBROOKS

From page 9
changes, which are increasing in popularity, offer individuals the chance to teach others what they know while placing them in a different environment, such as Saudi Arabia.

Esterbrooks said he believes the best training available comes in small doses such as conferences, which are usually specialized, like those sponsored

by the American Society of Civil Engineers, and open to both professionals and students.

They can be a supplement to studies as well as keep engineers up to date on new technology, he said, such as high-level radioactive waste management.

ASCE is also increasing the number and variety of conferences it holds each year.

"You will spend most of your

professional career in and out of the educational process, but it will be the most dynamic and exciting profession of your life," he said.

Esterbrooks' speech was sponsored by Cal Poly's civil and environmental engineering department as part of its 1990 Distinguished Lecturer Series discussing current issues in civil engineering.

Teach us a thing or two.

We're creating the fastest dial-up modems in the world. Our technology already allows data rates of over 19.2 kbps to be transmitted over any dial-up line. And we want your ideas for making it even faster. Here's a chance to apply your skills and knowledge to real life assignments. At Telebit, we'll provide you with an open environment, state-of-the-art tools, and plenty of opportunity to explore your every potential.

If you're graduating with a degree in Computer Science or Electrical Engineering and would like to get involved in modem technology, sign up to interview with us. And put your knowledge to the test. We'll be on campus May 3rd.

If you can't meet us on campus, send us your resume: Telebit Corporation, College Relations, 1315 Chesapeake Terrace, MS/8012, Sunnyvale, CA 94089-1100. EOE

vironmental Sounds" Friday 1 a.m. to Saturday 1 a.m.

•Recycling Olympics, Friday, 6 p.m. at the Women's Softball Field.

"Concern for the environment

is a common denominator for all the people of the world," said Rebecca Brannan, an English junior. "Becoming more aware of our environment is a sign of our maturity."

ASI

From page 1

said. "If we have more time, we can give more time to community activities which will help dorm residents when they move out. Cal Poly's overall reputation will be better.

"If we get classes that allow us to spend prime time in the residence halls, we can help produce better people in general to benefit Cal Poly," he said.

According to the Housing Department, every six years 16,800 students, or a figure equalling the entire current enrollment of Cal Poly, are residents in the dorms.

Under their job description, resident advisers are responsible for helping the university and ASI by encouraging involvement in campus activities and organizations, and by fostering commitment to the university's policies.

Jeremiah said there is a direct relationship between the amount of time a resident adviser spends with the residents and the community and university relationship fostered.

There are 45 resident advisers each year. Jeremiah said he feels that because the resident advisers represent every school on

campus, no one department will suffer as a result of resident advisers registering first.

"I think the benefit that the RAs can give will offset CAPTURE's problems," Manning said. "Although we get free room and board and a free health card, statistics say that this only equals 5 cents an hour."

"The school will get more of their money's worth out of RAs if we have choice schedules," he said.

If the proposal is accepted, resident advisers will register for classes in the same priority group as athletes and disabled students.

HAMIDE

From page 1

hardship on the hand of the U.S. government and its different departments."

In February 1987 copies of a secret INS plan were leaked to the press. This plan, entitled "Alien Terrorists and Undesirables: A contingency plan," was designed to round up thousands of Arab immigrants and to detain them in isolated campsites until they could be deported.

A documentary film, "Voices in Exile: Immigrants and the First Amendment," showed details of the case and outlined the fears Hamide expressed in everyone's right to hear and think as they please. He saw these actions as a "politically motivated attempt to silence the Arab community."

Hamide came to the United States to get an education. He was born in Bethlehem in the Israeli-occupied West Bank. He

graduated from the University of Oregon with a degree in psychology and later obtained an MBA in marketing.

The Arts and Humanities Lecture Series is in its 19th year and is sponsored by the School of Liberal Arts. The series will continue Thursday, May 3 with "Silent Lives: Guatemalan and Salvadoran Refugees in the United States," a lecture given by professor Norma Chinchilla from CSU Long Beach.

DETTLOF

From page 1

career choice," he said.

A foreign comparison could help his students better understand "American student performance and productivity" in relation to students of other nations, Dettloff said.

Winners of the scholarship are determined by their contributions to Phi Delta Kappa and the field of education. The organization's members must go through an application process to be eligible for the scholarship, Det-

tloff said.

Martha Silva, president of Phi Delta Kappa's San Luis Obispo chapter said, "The application process is competitive, and we're very excited about him winning the award."

Terry Wiedmer of Phi Delta Kappa's headquarters in Bloomington, Ind. said a joint committee of Phi Delta Kappa members, appointed by the executive director, selects the winners.

Winners are chosen by "their involvement in education, the

kind of leadership roles they present and how they intend to use their travel experience to benefit the education community," Wiedmer said in a telephone interview.

Dettloff has been teaching in Cal Poly's education department for 23 years.

He also has served as president of the San Luis Obispo and University of Wyoming chapters of Phi Delta Kappa, and he attended two biennial conferences for the organization.

Elephant soon to become a father

SYRACUSE, N.Y. (AP) — The amorous escapades of a 10,000-pound Asian elephant named Indy have captured the attention of the zoo world.

The 18-year-old pachyderm has impregnated two females at the Burnett Park Zoo. Babe is expected to deliver her baby around the last week of April and Romani is due in July 1991.

That's earth-shaking news for the continent's zoos, where just 62 calves have ever been born in captivity. It's also a sign of promise for the 35,000 to 45,000 Asian elephants that remain in

the wild as an endangered species.

"North American zoos are getting serious about reproducing elephants. The two pregnancies at Syracuse is evidence we are making progress," said Tom Foose, conservation director for the American Association of Zoological Parks and Aquariums.

To highlight the importance of the twin pregnancies, Jacksonville Zoological Park Director Dale Tuttle said there are only six other zoos with pregnant Asian elephants. An elephant's pregnancy lasts 22 months.

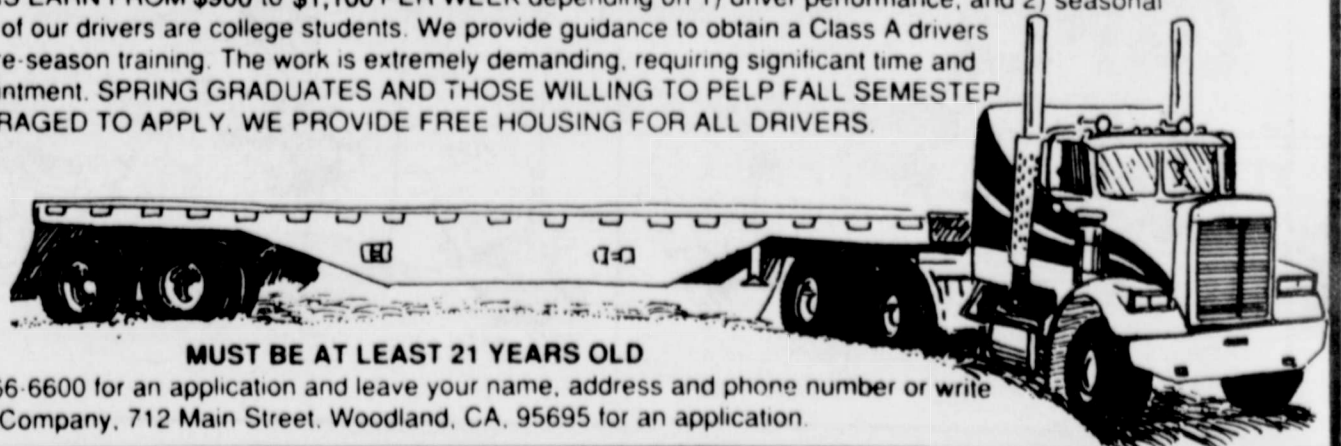

Only 14 of the AAZPA's approximately 150-member zoos have the facilities to breed Asian elephants, said Tuttle, coordinator of the AAZPA's Species Survival Plan for Asian elephants.

"There are only 11 proven male breeders in captivity and just 12 females that have reproduced," said Foose. "What's going on in Syracuse is very impressive."

"The survival of the species is dependent, in part, upon the establishment and maintenance of viable breeding of captive populations in North America.

SUMMER JOBS AVAILABLE

The Morning Star Company has hauled tomatoes from farmer's fields to canneries for the past 20 years. We require approximately 80 drivers starting July 1st through the later part of October, in Los Banos. OUR DRIVERS EARN FROM \$900 to \$1,100 PER WEEK depending on 1) driver performance, and 2) seasonal volume. Most of our drivers are college students. We provide guidance to obtain a Class A drivers license and pre-season training. The work is extremely demanding, requiring significant time and mental commitment. SPRING GRADUATES AND THOSE WILLING TO HELP FALL SEMESTER ARE ENCOURAGED TO APPLY. WE PROVIDE FREE HOUSING FOR ALL DRIVERS.

MUST BE AT LEAST 21 YEARS OLD

Please call 666-6600 for an application and leave your name, address and phone number or write Morning Star Company, 712 Main Street, Woodland, CA, 95695 for an application.
